Questionnaires:

Anna Siewierska and Eva van Lier have developed, in the course of 2010 – 2011, a series of versions of questionnaires that can be used to elicit data on a wide range of three-participant constructions. These questionnaires have been widely used by colleagues both within and outside the Eurocores programme; both by fieldworkers describing under-studied languages and by international colleagues speaking better studied languages. The data obtained in this way have been used in the publications and presentations listed elsewhere.
